BEWARE OF COUNTERFEITS.

It affords me pleasure to assure you that after using Dr. C. Melanne's Celebrated Liver Pills for more than twenty years in my family, that I regard them as being superior to any I may ever used or have seen used. I have not had them constantly and had to try others, and I have tried a good variety, but I have never that the most grailfying results. For children, with the most grailfying results. For children, having used them on my own with such casy and happy effect, I would recommend them to one and to all. These pills do the work—do it promptly, do it well, and leave no ill effects behind. As a bile remover, as a liver corrector, as a forerunner preparing the system for quinine, there is no pill or medicine equal to Dr. C. McLane's Celebracy and the system for quinine, there is no pill or medicine equal to Dr. C. McLane's Celebracy and the system for quinine, as they have been in the past.

Yours truly. E. H. Gries.

The Harpooner's Story.

New Bedford, June 1, 1889.

Dr. J. C. Aten is Co.—Twenty years ago I was a harpooner in the North Paelle, when five others of the crew and myself were laid up with scurvy. Our bodies were bloated, gums swollen and bleeding, teeth loose, purple blotches all over us, and our breath seemed rotten. Take it by and large we were pretty badly off. All our lime-line was saccidentally destroyed, but the capitain had a couple dozen bottles of Atran's BARBAPARILLA and gave us that. We recovered on it quicker than I have ever seen men brought about by any other treatment for Scury, and I've seen a good deal of it. Seeing no mention in your Almanuse of your Saraparila being good for scury, I thought you ought to know of this, and so send you the face.

Respectfully yours, Ralfelt Y. Wingarts.

THE AFTER DINNERINAP.

L Few Observations and Facts in Regard to the Post-Francial Luxury.

A writer in the Fortnightly Review says: There is much difference of opinion oncerning the desirability of an after

"Brain work should certainly be forbidden after dinner; the interval between
it and bed-time should be devoted to recreation and amusement. In the case of
elderly people a short map after a late dinner often aids digestion, but as a general
rule it is better for such persons to take
their principal meal at 2 P. M. The digestive powers of most elderly people are at a
low ebb-in the evening. When sleeplessness is troublesome relief should be sought
for in the discovery and removal of the
cause whenever possible. The condition
is often due to indigestion, and when this
is the case the ordinary remedies for inducing aleep are worse than useless. The
nervous reintions between the brain and
the stomach are so intimate that disorder
of the one organ is almost certain to affect
the other. Excitement, worry and anxiety, which have their east in the brain, interfere with the functions of the stomach. riere with the functions of the stomac and in like manner anything that unduly taxes the power of or irritates the stomac

taxes the power of or irritates the stomach disorders the circulation and nutrition of the brain. The sleeplesaness often complained of by gouty persons is due to the poisonous effect of the morbid material upon the nervous system. Excessive smoking, too much alcohol, tea and coffee, often resorted to by overworked persons, are frequent causes of alcoholesses. In are frequent causes of aleeplessness. In all the cases the cause is removable, while the affect may be counterbalanced by appropriate treatment. Nothing by jappropriate treatment. Nothing is more muschievous, however, than to continue the habits, and to have recourse to drugs to combat the effects. A due amount of exercise need not be of a violent character. A walk of two or three miles daily is sufficient, and is perhaps as much as a busy man can find time for. A ride on horseback, the Paimerstonian cure for goot is probably the best form of an analysis. ride on horseback, the Paimerstonian cure for gout, is probably the best form of exercise for those whose minds are constantly at work. It has been well said that a man must come out of himself when in the saddle; he is forced to attend to his horse and notice the objects he meets. Walking may be a merely automatic process, and afford little if any relief to the mind, and carriage exercise may be practically valueless, if the mind is not diverted from what had previously occupied it."
